Mei Carmel Ltd. Haifa's Water and Sewage Corporation

INFORMATION FOR THE RESIDENT
PREPARATIONS FOR A STATE OF EMERGENCY

A water crisis is a situation in which there is a significant and unplanned disruption in the regular supply of water to the residents' homes. This situation may happen in times of war; however, a state of emergency can also take place during routine time and with no prior warning, due to significant damage to the city's water sources and the water and sewage infrastructure. This event may occur as a result of a prolonged power outage, damage or natural disasters, such as: earthquake, fires, etc.

> **The Mei Carmel Corporation is optimally prepared to cope and function during a time of crisis until the quick return to routine.**

The Mei Carmel Water and Sewage Corporation, together with the Haifa Municipality, Mekorot Ltd. and the Water Authority, is prepared to handle incidents involving damage to the water and sewage system, including the distribution of water to the residents, by deploying water distribution stations citywide (the distribution points and information regarding their operation hours are found on the corporation's website), all this until the systems resumes to its normal functioning.
